**Exclusive:** WORLD

### A selection of Hermínio Martins's philosophical reflections on the contemporary world.

'This superb collection of selected essays by Hermínio Martins is a timely contribution to ongoing debates on the transformations of the human condition and the very future of the human species.'

—Jose Esteban Castro, Emeritus Professor of Sociology, Newcastle University, UK, and Principal Researcher, National Scientific and Technical Research Council (CONICET), Argentina

'The Technocene will inaugurate nothing short of a new and fertile research tradition in sociology, specifically in the philosophical sociology of technology.'

—Bridget Fowler, Co-editor of *Time, Science and the Critique of Technological Reason: Essays in Honour of Hermínio Martins* and Emeritus Professor of Sociology, University of Glasgow, Scotland

'Marked by an unprecedented confluence of bodies, markets and technology, the notion of Technocene is the harbinger of the Anthropocene. Professor Hermínio Martins's final essays, nearly lost to time, are brought to life in this caringly produced posthumous collection.'

—Nicholas J. Rowland, Associate Professor of Sociology and Environmental Studies, Pennsylvania State University, USA

Hermínio Martins was a distinguished Portuguese sociologist. 'The Technocene' is a selection of some of the most important philosophical essays – a few unpublished – that he wrote following retirement from the University of Oxford. The essays address the ethical and societal consequences of the commoditization of the human body and mind.

### About the Editor

S. Ravi Rajan is professor of environmental studies at the University of California, Santa Cruz, USA.
