Analyses how demographic knowledge production and states' grip to the variable of population intertwine.

The book analyses how demographic knowledge production and states' grip to the variable of population intertwine. It introduces the concept of the Malthusian matrix in order to understand how class-selective and racist hierarchies within population narratives are combined with gendered policies of reproductive bodies and behaviours.

Contents

Introduction; Acknowledgments; Part I Blaming 'Population' for Multiple Crises; 1.Exploring the Multidimensional Concept of Demographization: The Case of Germany; Part II Projecting Migration: Dangerous Statistical Narratives; 2.Demographic Futurity: On the Power of Statistical Assumption Politics; 3.'Too High' or 'Too Low'?
